

# OPEN CIRCUIT

## open circuit

**From the early thirties, it have been whispered that we have been getting visits from another world, and for those people with a close mind, they thought it was just a distraction from the many problems we had at the time, and the people that were saying those things, were a little off to say the least.**

**As the years went by, what was whispered, were now been said out a loud, the credibility of the people that were spreading the news about people from another world, were now been put in question, no one could, or would corroborate the story, but the people who believed with all their art that these visit were real, were now looked upon as crackpots, nevertheless they held steadfast to their story, and kept making reports about U.F.O.**

**The story about U.F.O. were now been talked about, from the east to the west, and in every corner of the world, each story were more elaborate that the one before, so much so, that people were now saying that they were abducted.**

**The abductees were also saying that they were operated on, and that their life has been changed, as a result of the experience they have been through.**

**The belief in god, and that there is life after death, have made some people refuse to even listen to any story about space men, or to think that there is any other life in the universe, but we the people on planet earth, because if they were to entertain such a thought, then that would put a spoke in the wheel of their belief, and that would not do at all, the crutch that they relied upon for so long, were now been put in question. What I am I to do they would say, leave me with my dreams.**

**There is a saying, if you find a fool, leave him a fool, he or she is safe in their stupid skin.**

**We on planet earth have progressed to a point, that we could destroy the planet with the push of a button, and some nations actually believe that they have the right to control the planet, and if you try to stop them, then you will be killed, and as a result of that mind set, they spend a vast amount of money on weaponry, and while they are successful in weapons, a few social programs were neglected, but these brain wash people, draw comfort from the fact, that they could beat any nation on the planet, but if those things are important to you, then as they say, whatever makes you happy, but I say, that is poor judgment, and short sighted.**

**Because the day will come, when other nations will progress, to the point when they too, will have the ability to defend them self, and also have the ability to split the atom, and if they were still licking their wounds from pass hostility from the west, then it goes without saying, that they would seek revenge.**

**Pride in self and country, demands that revenge must be taken, if the country in question, is to maintain its dignity.  
JAPAN comes to mind.**

**Now back to the question of life on other planets, and the question every one want an answer to, and that is, are we getting visits from another world, if the answer is no, then from my view point, there is not much hope for mankind, and the reason I made that statement is this, we are very good at killing each other, and taking from others, things that does not belong to us, and if this is the best we can do, then I don't call that progress.**

**On the other hand, if the answer is yes, we are getting visits from another world, then we need to change our ways, and start to look beyond the next quarterly report from the stock market, because no amount of cash, will repair the damage we have done to the world, and also to the sky above.**

**Let us for the moment say, that the visits are real, and there is a vast amount of evidence to prove that, if the life form that is visiting us for**

such a long time, have the ability to do interstellar travel, then it goes without saying, that they, whoever they are, also have the ability to destroy us if they so wish, that been said, then I think it would be a good idea, for us to rethink the way we play with nuclear weapons, what with the testing and such like.

When we test a weapon, this can be seen from space, and this could be misunderstood, or mistaken for an act of aggression, happily that question have been answered, because, we have been testing for a long time, and no one from another world, have retaliated, so far that is.

We on planet earth, have a bad habit, of shooting at anything we do not understand, or have not seen before, this way of thinking must be a thing of the pass, because one day, some one, or some thing, may shoot back, and I for one would rather talk.

You may think that I am over reacting, and I could be, but let us for the moment, analyze the pass two thousand years.

The first thing we will do, is to replay pass events, and the first thing I remember, if the story is correct, are it is to be believed, CANE killed ABLE.

And they were brothers, and he may have loved his brother, but the jealousy in him, was stronger than the love he had for his brother, so because CANE was snubbed, he felt ashamed, and the feeling would not go away, so the next best thing, is to get rid of the person, who he thought, place him in that position, and the only one there was ABLE. There is more.

Then I red that god said, I am a jealous god, and if you do not worship me, I will kill you, and there is no other god but me, that make me a little anxious, because god is, and should be everything, and he does not need to say so.

Now the question should now be, did god said those words, I don't know, I was not there, and neither were you, but for the sake of this discussion, we will play along with the story.

**I have many reservation about many pass teachings, because I am skeptical of the motive behind the teachings, although many years have gone by, since the early teachings, I still wander about the motive behind the teachings, I may have said this before, but when you believe something very strongly, you tend to repeat it.**

**People with week mind are easy to brainwashed, and educated men throughout history, have used this method to control the people.**

**Therefore, the people who want to control you, will not allow any one to put a doubt in the mind of the people, so this thing about the U.F.O will put doubt in the mind of the people, so every effort is made to prevent the truth from coming out, because the rolling body, or class, if you prefer, think that they are invincible, and they want you to think so as well, so if you do not warship them, they will not have you around, because you must do as you are told, and do not question anything, if you are a free thinker, then you are a threat to the new world order.**

**Come to think of it, that word, world order, have been used a lot these days, and the action of the super powers demonstrate what they mean by that statement.**

**I am a man who pays attention to history, and the reason I pay attention to the pass, it is a good guide to the present, and the further, I also make a mental note of the people involved in pass atrocities, names may have been changed, but blood line continues, and the great grand child of a bad man, could, and may still carry the generic blue print of the grandfather, so just because the grand father is gone, his seed still lives on, so don't take anything for granted, a snake is a snake, and always will be a snake.**

**1879 comes to mind, that date make me smile, because the British tried to dominate the ZULU people, and was thought a lesson that they will never forget, and at the time the British ruled the world, so they thought.**

**The bigger they are, the harder they fall, it was true then, and it is also true today.**

**You will not stay young for ever, you will get old and gray, but you should not be sad, because the pay off should be wisdom, but judging by the action of some of these old statesman, I sometimes wander, if wisdom comes with age, it does, but not in all cases.**

**We look upon others that is a little different from us, as not worthy, and that they should be put down, or not allowed to live among normal people,**

**now who is going to define normal, what is normal to me, may be peculiar to someone else, take the color of your skin for one, if you are white, it is believe that you are at the top of the food chain on planet earth,**

**and that is not just words, because there was a time, when the whites would kill blacks for sport, and the reason this action was allowed to go on, was simply this, all the people in charge were white, and they were of like mind.**

**The sad thing is this, those people who have treated my people so badly, have not paid for their crime, and until they have paid for pass action, the world will not change, or I should say, the people in charge, will not change their ways.**

**I think of AFRICA some times, and in particular the ZULU tribe, the people from Europe went to Africa, and had the nerve to say, how can such a vast amount of land be control by a bunch of stupid blacks, we will have to do something about that, and they did, but at great cost I might add.**

**A stone that glitters were found in South Africa, and that made the decision to control that region, even more important for the west, and today we have the black gold, yes oil, and as they say, history will repeat it self, because the same thing that took place in AFRICA back in the 1800 will happen again, we have not learn one dam thing, now do you still think that I am creasy, when I say, a snake will always be a snake.**

**Today we have a commodity that is going to send a lot of people to an early grave, and this commodity is oil, and it just so happens, that this oil, is not where the rolling class live, this mean that the people who want to roll the world, cannot do this control thing, without the oil, this also means, a lot of people will have to die.**

**The killing will be given a new name, and the name will be, world peace, and in order to have world peace, then we will have to root out all the bad people, or the people they call bad.**

**It have been said in many quarters, that there is another form of power that is available, and it will reduce the need for oil, now that will not do at all, and to make matters worse, this new form of energy would make the desert bloom, and it would reduce starvation around the world, now everyone knows that a man or woman think much better on a full stomach, now the last thing the big powers want, is well thinking people, a man in need, is a man you can control, and control is the key word, so don't think for one minute, that the government could not do more for the people, oh yes they could, but if they did, you would stop begging, and when you beg, a deal will have to be made, and the one with the goods, have total control.**

**The rolling class made the rolls, and if they get caught up in the rolls that they have made, then they would just change the rolls, and the reason they did that, is because they can.**

**The day will come, when what is in today, will be out the next day, and those at the bottom, will now be at the top, and that day will come, I only pray, that when that day comes, we have lost the desire to take revenge, because that would mean, that we have not learnt from what the rolling class have done, and if we are going to change, then a total change from the pass must be achieved, and that change must not include killing.**

**Earlier I talked about a new form of energy, and that the government have it tucked away, they cannot allow this new form of energy to become widespread, because equality is not a nice word to people who want to control the world, so when people talk about visitors from another world, that make the rolling class nervous in deed, and I will tell you why, for a very long time, we have been getting visitors from another world, and you may say so what, just one doge gone minute, as you know, we are a violent set of people, and this have been observed by the visitors for a long time, now ask yourself this question, how come they have never did any arm to us, and you know it is not because they could not, it is because they do not wish to, now you say to me, prove it, ok I will.**

**If the visitors travel all that distance to get here, you know that they are not using the type of fuel that we use, so if we accept that fact, then when one of the space ship crash, you know that we are going to pick it up, and study it in detail, then after we have studied it, we are going to try and copy the technology, and that is the energy I was talking about before, we have come a long ways over the years, but I have notice a very fast leap from the early nineties, some of which I know was our own ingenuity, and some I think was copied, I myself does not have any proof of this, but something came to mind, and it is this, we were told that we went to the MOON, way back m in the sixties, yet today we seams to have a problem, going three hundred miles in the sky to a space station, I wander?**

**It is like a golf swing, once you have found the grove, and the zone, you stay in the grove and the zone, and that will always produce a good round of golf, so if we perfected this space travel thing way back in the day, how come now, we are having fuel leaks, and badly fitted seals, why not use the same type of seal you used back in the day, don't make me laugh.**

**Just to prove a point, and I am going to use my self as the model, I hit a pitching wedge about 150 to 165 yards, and I hit a sand wedge about 130 to 145 yards, I know some of you will say, no way, but I must warn you, before you say I can't do that, stop, think, then ask your self, how does he do that, in fact I sometimes hit my six iron 205, but I will let you in on a secret, I have very fast hips, and as a result, I turn very fast, meaning my left hip is way ahead of the club, so to compensate, I close my club face, for those that don't know, I turn the club face over, so it is close at address, but when I turn, remember the fast hip, ok, now the club face is square to the target, and that baby goes like hell, now you are going to ask, what is the point of me telling you all of this.**

**Remember I was saying about space travel, and how well they say we did back in the sixties, all I am saying, is if you find something that works, stay with it, until it does not work any more, I now hope that you understand.**

**For this thing about U.F.O.**

**I may be a little off, but I do think that there is life in outer space; in fact I think that there is a lot of life out there, and I also think that we**

**have been visited many times, furthermore there is evidence to that fact, I also think that the government knows a lot more than they are telling us, because they don't think that we could handle the truth, well I say, let us decide that for our self, in fact the government work for us, and not the other way around, because when the government is caught in this lie, and they will, there will be hell to pay.**
