

desmond and phil more

the
banter

THE BANTER

It started one day on a park bench in New York Cit , DESMOND always like to share his lunch with the pidgins of the city, he felt that since that the pidgins were also new Yorkers too, he felt it was only fitting that he share his good fortune with them, so DESMOND would take his newspaper and his lunch and take a welcome break on the park bench.

DESMOND was munching away, and at the same time he would break off a piece of bread and throw it at the pidgins, he actually recognize some of the birds, because he have been feeding these birds for a number of years now, and I think they know him too, each one of the birds seams to have there own personality,

and each one of the birds act a different way, so DESMOND would catch himself talking to the aggressive ones, and telling the bird, the bad one that is, to let the others get some of the bread,

and stop being so selfish, he would catch himself, then he would say, I can't believe I am talking to a dam bird, jus then he saw this man walking towards the bench that he was sitting on, so naturally he moved up the bench to allow the man to have a seat also.

The gentleman sat down and at the same time the man said hi there, my name is PHIL MORE, nice day isn't it, DESMOND said you got that right, we could do with a few nice days, the winter was a rough one, PHIL MORE said I will have to agree with you on that one,

oho by the way my name is PHIL MORE, DESMOND said hi PHIL, my name is DESMOND, and boy I love this park, PHIL said you will not get an argument from me on that one, these are some of the good things that the council do, that is why when I pay my taxes I let them slide, because they have this park looking very good this year.

DESMOND kept feeding the birds and PHIL just sat there reading his newspaper, then out of the blue PHIL ask DESMOND what does he think of the mess we have just found our self in?

DESMOND said, well if you ask me those people had to be thought a lesson, you don't just come over here and kill more than three thousand of our people and think you are going to get away with it, that is what I have to say about the whole thing,

PHIL said, the kick back part I have no problem with, but you should kick the right people, and I do not think that we are kicking the right people.

DESMOND said, well those people have to be thought a lesson, and even if they had nothing to do with the T/C bombing they needed to know who is bass, and I think they now know,

PHIL, said , you know what I think, I think that we have open the flood gate to hell, because there is no way you are going to tell me that all those people that we have killed, and remember they have ever done anything to us, and for that I think the relatives of the dead, will some day exact revenge on us for that, and that is the part that bothers me, if nothing else.

DESMOND said, well I think Some of the outsiders just come over the border to earn some cash for their family, and I think that they are misguided people, who had no further anyway, but the bulk of the people had no problem with us, it is a sad state of affairs.

DESMOND went into a long dialog explaining to PHIL what we, as a country should do to the Middle East and the sooner the better.

For one they are a bunch of fools, they should know by now that they have no chance in hell of deflating our resolve, in every century there is always one nation that have to step up top the plate and take charge, and my friend it is us the U.S.A and the sooner those people get that into their heads the less suffering there will be.

A mom bow jumbo religion that they have will have to go, in a society like ours; you cannot have people stopping to pray at the drop of a hat,

That will not do at all, we would loose too much man hours, and we would not be able to make a profit, no sir that will not do at all, no sir.

PHIL then jumped in and said, but they have not brought that to this country have they, DESMOND said , and we will not let them get a foot hole either, because that would be the end of the lifestyle we love so much, and besides they treat their women like dirt,

there women have no rights and they can't take part in the running of the country in anyway, is that what you want in this country, man are you out of your cotton-picking mind, pardon my French.

PHIL said, I don't advocate letting them do anything in the united states, but what I do say, is leave them the hell alone, they have been living like that for thousands of years, and no dough will continue for another thousand years, so I say leave well alone, that's all.

DESMOND turned to Phil and said, look man, we as a people use a hell of a lot of oil, and we are used to living a certain way, and neither you or I will ever give up our lifestyle, we need the oil, and besides they don't know what to do with all that cash, they will spend it on the wrong thins,

PHIL said, well if I am not mistaken, they gave us the oil and we give them the cash, so it should not matter what they do with the cash, because they don't seams to give a dam what we do with the oil, so we in turn should not fuss with them for building pelisses or swimming pools,

DESMOND said, it is not the swimming pool that get to me, what you seams to overlook is the fact that these so called freedom fighters is funded with the same cash we give to the dictatorship, we as a nation cannot allow a dictatorship to have control over such a large amount of cash, with all those terrorist running around the world, where the hell do you think they get their funding from, and if you don't know, I will tell you my friend, that cash they get from the oil is used to fund those freedom fighters, so the only way to put an end to that is to take over the oil, and we will feed the people, we will also

supply the power and the water, and once their gut is full they will soon put the guns down, all we have to do is to find the trouble makers and put their light out, and you will see how quick that mess settles down.

PHIL turned to DESMOND and asks him, if he remembers that we had slavery in this country at one time, DESMOND answered, yes, we did, but I did not say that we were perfect.

PHIL then ask DESMOND, what should the black people do about the way we treated them in the pass, DESMOND said, but we don't treat them like that anymore, PHIL said, I know that, but don't you think that there is a lot of black men that would like to exact revenge?

DESMOND said, may be, PHIL said, may be my foot, I have met a few, and believe me you cant tell by looking at them, but when you get to talk to them, you would be surprise of what is going on in the head of some of these black men,

Ok then let me ask you this, let just say that a handful of black men just up and start to act like those people in the Middle East, what you would say then. DESMOND said, I could never see that happening in this country, PHIL said, my friend, never say never, and I will tell you why,

we as a people talk in a way that gives the impression that we think that every one else is less than human, we talk about how good we are, we talk about how stupid every one else is, even if it is true, I think we should say less and do more, I don't think that they dislike us, I think that they just want to shut us up that's all, what do you think about that?

DESMOND said, well some of us do talk a lot of trash, but we all don't do that, PHIL said, of that I will agree with you, but you should listen to the radio some times, I tell you if I was an outsider and listen to the radio I too would get P off.

DESMOND said, look man this is our country, and we can say what the hell we want to say, and who don't like it can leave, PHIL said, well the ones that took offence, did leave, but the problem is this,

When they get back home, they told the other ones what we have been saying about them, so what they do is to take revenge on our people over there.

PHIL turned to DESMOND, and ask DESMOND if he know that we as a nation borrow a lot of money from CHINA, the balance of payment between CHINA and the U.S.A is so wide in favor of CHINA that you could drive a eighteen wheeler through it.

DESMOND said, man you are full of it, this is the richest country in the world, we don't need anything from any one, PHIL said, well that is part of the problem, you and a lot of people like you have no idea of what is going on

in the world, in many instances we are not informed about many things, we are spoon fed a few sound bights and we run with it, we need to take a step back and ask a few more question, and then you will see the world through fresh eyes.

Then PHIL said, well my break is over, it was nice talking to you, I will have to go back to the office, DESMOND said, thanks for the chat, and I did learn something, I did not know that CHINA had something over us, well I'll be a sun of a gun, anyway have a nice one buddy.

When PHIL left, DESMOND said to himself, how the hell did we ended up owing CHINA so much money, what the hell is our government doing, dam it.
